React.js, Next.js, Vue.js	Rest, GraphQL,	Cypress
Redux, Pinia, Zustand	Websockets.	Unit Tests
mui/antd/vuetify/shadcn	SQL	E2E
Tailwind	LLM apis	
Refine		

DB:	Cloud:	Other:
PostgreSQL	AWS	Microservices
MongoDB	Supabase	OOP/SOLID/DRY/KISS
Redis	Firebase	Docker
Firestore	GCP	Git
	Vercel	CI/CD
	Netlify	Agile/SCRUM

Work experience:

November 2024 – Present, Full-stack & Founder at [AI Diet Planner](#)
Tech: Next.js, Supabase, Node.js, PostgreSQL, OpenAI
AI-powered diet planning app. Share your preferences and measurements and get a weekly meal plan with a shopping list and diet overview.

March 2024 – Present, Senior Full-stack Developer at [Riseapps](#)
Tech: Node.js, PostgreSQL, AWS, React, Nest.js, Docker.
Responsibilities: My primary focus is on the back end, where my expertise ensures data privacy and compliance with regulations like HIPAA and GDPR. I work on developing microservices, DevOps, and CI/CD on AWS.
Projects:
• [Voxx](#) - running application with AI generated training plans connected to smart sneakers, my role was to develop the back-end with microservices architecture and handle DevOps on AWS.
• Partner portal that allows IVF centers and surrogacy agencies to easily manage their clients and schedule appointments for maternal-fetal medicine screenings, made for [Mitera](#).

October 2023 – February 2024, Freelance, personal projects, education.
Tech: HTML/CSS - Javascript - Typescript - React - Redux - Next.js - Node.js - Nest.js - MongoDB - Docker - GCP - Firebase, Supabase
Projects:
• Helped company [4IRE](#) to finish the project on time - Crypto investment/trading Platform [Equadyne](#), I developed pages responsible for searching and displaying investing and trading activities and connected them to the back-end. I also made the landing page.
• Built a chat integration for [Texterchat](#) that can be added to the website, Deployed it to GCP in a docker container, and developed a service to connect it to the rest of the client's product - a customer support app that uses Whatsapp and Facebook Messenger.
• Built [Chures](#) - A recruitment app designed to connect businesses with talented students seeking flexible employment opportunities in Sweden (As a CTO and Co-founder)

October 2022 – September 2023, Senior Full-stack/Lead Developer at [Instandart](#)
Tech: HTML/CSS - Javascript - Typescript - React - Redux - Next.js - Node.js - Express - Jest - SQL - PostgreSQL - REST API - Tailwind - Docker - AWS
Responsibilities: I worked on applications to improve the learning process of airline employees.
• Started from scratch and completed 2 projects.
• Lead 2 other developers + a designer.
• Front-end development.
• Back-end development.
• REST API development.
• Product design.
• Mentoring.
• Code review.
• Interacting with a client.
• Tasks planning and estimating.
• Performance improvement.
• Writing documentation.
• Basic CI/CD
• Deployments to AWS
Projects:
• Course Scheduler - app to plan courses using an interactive Gantt chart.
• E-logbook - an app that manages the learning process in courses.

May 2021 – September 2022, Full-stack Developer at [Into The Source](#)
Tech: Javascript - Typescript - HTML/CSS - React - Redux - Node - Express - REST API - MongoDB - Jest - Cypress
Responsibilities: I was working on E-commerce apps and other solutions for retail companies
Projects:
• Order configurator for curtains integrated into [Spotlight.](#)
• Stock management and report system for Vadain`s factories.
• Easy Order 2 - order configuration for Vadain.
• [Sample Service](#) - ordering samples from Vadain.
• [House of Dreams](#) - corporate website for internal use.
• [Curtain Suggest](#) - demo app that analyses colors on the photo of a room you uploaded to suggest curtain fabrics that will match it.
• [Home Made By](#) - order configurator for home decorations.

December 2020 – April 2021, Full-stack Developer at [TTN Roadside assistance](#)

Tech: Javascript - Typescript - HTML/CSS - Vue - Vuetify - Firebase - Stripe
Responsibilities: Contract project where I, on my ow,n created a solution for a Canadian roadside assistance company to:
• Accept payments from their customer with Stripe.
• Dispatch requests for different services to different locations.
• Map integration to track their locations.
• Call log integrated with CallRail, job log, and dashboard.
• Invoice log, invoice generator.

April 2020 – November 2020, CTO at [List Scouts](#)
Tech: Vue - Vuetify - Javascript - HTML/CSS - Product Management - Team Building & Leadership
Events and activities discovery platform. It started as a freelance project to make a prototype for a client. Later, the customer wanted to invest more, so I helped him build a team and managed it.
Responsibilities:
• Front-end developer.
• Found and gathered a team of 1 designer, 2 other front-end engineers, and one back-end engineer.
• Recruitment, conducting Interviews.
• Communicating with the founder.
• Planning development process.
• Project & Product Management.

August 2018 – April 2020. Front-end developer at [Lasting Dynamics](#)
Tech: React - Vue - Javascript - Typescript - HTML/CSS - Jest
Projects:
• [Roundrush](#) - a work management system like Jira
• Coraly - CRM system, sales tool.
• Mindcap - HR platform.

Education:
September 2016 **–** December 2021, Master's degree,
Economics & Management at Zaporizhzhia National University.

Hobbies:
Chess, Brazilian Jiu-Jitsu
